

Syrma Technology receives TL9000 Telecommunications Industry Quality Systems Certification

October 10, 2007: Today Syrma technology achieved certification of its quality systems to be in compliance with the Telecommunications industry standard TL9000. TL9000 was developed by QuEST Forum (Quality Excellence for Suppliers of Telecommunications) to meet the quality requirements of the worldwide telecommunications industry. The certifications process evaluates compliance in several areas:

- Establish a common set of quality system requirements and effective performance and cost-based metrics to guide processes
- Evaluate results of quality system implementation
- Drive continuous improvement
- Enhance customer/supplier relationships
- Protect the integrity and use of telecommunication products and services

Jaideep Tandon, CEO of Syrma Technology commented, “This approval is another significant milestone in our long history of supporting the needs of global telecommunications equipment OEMs, who are supplying equipment to India’s Telco service providers. Achievement of TL9000 will further enable our OEM customers to support the demands of the ever expanding domestic India and Asia region infrastructure equipment market. They can have the added confidence that production at Syrma is in compliance with global telecommunications production standards.”

About Syrma Technology

Syrma Technology (www.syrmatech.com), a Tandon Group company, provides global OEM’s unique opportunities to reduce product development costs and deliver globally competitive manufacturing services through leveraging Syrma’s contract engineering and manufacturing services. Syrma has a 30 year legacy of creating innovative electronics manufacturing and fulfillment solutions for global end markets, and to enable OEM’s to grow their presence in the rapidly expanding India market. We specialize in collaborative design (CDM) and electronic manufacturing services of med/high mix and flexible volume electronic products, RFID tags and
